**TRS Workgroup Recommendations for Long-Term Financing**

The TRS workgroup reviewed the current quality initiatives and spending and recommends the following regarding long-term financing of the TRS Program:

- The Texas Legislature should maintain current budget levels for the TRS Program, but plan for increased budgets as the number of TRS Program providers grow;
- The state should encourage public-private partnerships, local government contributions, and private foundation funds to expand the amount of available funds for the TRS Program
- TWC should consider the feasibility of creating a fee-for-service for TRS mentoring services for non-subsidized providers.
