# Introduction

The Texas Workforce Commission (TWC) is pleased to submit this report in compliance with legislative requirements. The Business Enterprises of Texas (BET) Customer Satisfaction Survey and Cost Analysis Report is submitted pursuant to TWC Rider 39 as part of TWC performance reporting for the BET program for the 2018–2019 biennium. Rider 39 reads as follows:

“The Texas Workforce Commission shall report by October 1 of each year of the biennium the following information to the Legislative Budget Board and to the Governor:

- a. The results of the survey and the Cost Analysis Report distributed to state host agencies on satisfaction of operational conditions such as pricing requirements, hours of operations, menu items, and product lines; and
- b. The total cost incurred by each state host agency for the operation of Business Enterprises of Texas cafeterias, snack bars, and convenience stores. Reported costs should include the value of the space used, maintenance costs, utility costs, janitorial costs, and the method of finance for each cost. An outline of the methodology that was used to determine the final estimate should also be included in the report.

The Customer Satisfaction Survey and Cost Analysis Report shall be prepared in a format specified by the Legislative Budget Board and by the Governor.”

The Survey of Customer Satisfaction was distributed to all state agencies in which BET operates a food service cafeteria, snack bar, or convenience store. A total of 3,074 individuals from 46 agencies surveyed responded. The number of responses represents an 18.2 percent increase in respondents from last year and a 14.7 percent increase in agencies represented in the results.

Since its inception nine years ago and until two years ago, the survey was conducted during the month of August. Two years ago, the survey was

conducted during the month of June to allow more time for compiling and analyzing data prior to the submission deadline. The result, even after extending the survey through July, was a significant drop in respondents. The survey was extended through the month of July. Last year the survey was conducted in July and, once again, an extended response period was needed to produce useful response numbers. This year the survey was conducted in May and the results were far better. This adjustment, along with more frequent communication with host agencies before and during the survey, eliminated the need for an extended response period.

The survey process and the survey and report design have been improved over the years. Improvements include:

- color posters placed in BET facilities before and during the survey to announce the survey dates as well as self-adhesive notes that included the URL for the survey;
- additional and repeated contacts with facilities staff to better promote the availability of the survey in buildings that hosted BET facilities;
- the introduction of new survey questions as well as the retention of several of the existing questions to enable trend analysis;
- Including survey results from the previous year in the report for questions that remain the same from year to year; and
- the survey being done in May.

## Actions Taken because of the 2018 Customer Satisfaction Survey

BET distributed survey results to licensed managers who operate facilities and asked them to make improvements where possible.

Managers were made aware of compliments and best practices identified by customers.

Complaints and compliments were reviewed with the managers so that areas for improvement or commendation could be recognized. The results of the survey were used as an educational topic during a general session at the 2018 annual BET

Training Conference.

The program continues the healthful-options program, **Better Eating Today**, which offers snack and menu items that have:

- less than 35 percent fat;
- less than 10 percent of calories from saturated fat;
- less than 35 percent of total product-weight from sugar; and
- less than 350 mg of sodium.

Program staff provides managers with point-of-sale signage displaying healthful options in food service and vending machines to raise awareness about healthful food options. These efforts resulted in another year of slight gains in customer satisfaction in this challenging area of food service.

## Summary of the 2019 Customer Satisfaction Survey Results

Although most of the categories surveyed remained stable, within one to two percentage points from 2018 to 2019, BET survey respondents once again reported that they saw slight improvement in BET operations in the areas of overall value and product selection. Many respondents provided preferences and opinions consistent with those received in past surveys.

Survey responses showed that there are still areas for improvement, including the expansion of healthful offerings. BET offers training to staff and licensed managers in areas that need improvement.

Respondents showed a slight decrease in satisfaction with the product pricing in our facilities.

Respondents once again listed healthful offerings such as soups, salads, sandwiches, and chicken as their most frequently desired menu options. However, the largest percentage of customers (44.17 percent) responded that normally they purchase a meal consisting of meat and vegetables in BET facilities.

Customers responded, as they have in the past, that they value convenience, location, and price above all when deciding to shop in BET facilities.

Customers once again responded that the biggest competitor of the BET facility is the customer nonretail food sources. This is usually because respondents bring food from home.

The 2019 survey also included several new questions designed to clarify preferences based on customer comments received in previous surveys. These questions delivered new data and trends that may be used for improvements in the future. BET staff learned or confirmed the following from the questions:

- Over 90 percent of all respondents use the services BET managers offer in their workplace. However, BET staff also learned that there are opportunities to increase the frequency of customer weekly visits, as many respondents reported that they seldom shop in BET facilities.
- When offered the new response choices of “seldom eat here” and “do not eat here” in addition to the response of “once a week” with respect to the frequency of breakfast, lunch, and vending machine purchases, about 45 percent of respondents moved their answer to the less frequent options.
- Respondents made it clear that they prefer shopping at BET food service facilities over vending machines. Respondents also said that they most often buy nuts when they make purchases from vending machines.

# 2019 Customer Satisfaction Survey Results

The following tables and graphs reflect the 3,074 responses to the topics addressed in the survey. For the questions that were used in both the 2018 and 2019 surveys, the graphs also reflect 2018 survey results.

## \*New Question for 2019

Do you use the Food Service or Vending services offered in your location?

Responses	Response Percent	Response Count
Yes	91.54%	2,781
No	8.46%	257
<b>Answered</b>		<b>3,038</b>
<b>Skipped</b>		<b>36</b>

## Agency Responses Percent

# Cost Analysis Report 2018

An inquiry was submitted to the 17 state host agencies in which BET operates a cafeteria, snack bar, and/or convenience store. All the host agencies responded. There was inconsistency in methods used by respondents. The host agencies included in the survey and a summary of the costs reported or known are listed in the following table.

FY'18 TWC Food Service Location and Type	Address	Annual Value of Space Used 2018*	Estimated Maintenance Costs	Estimated Utility Costs	Estimated Janitorial Costs	Method of Finance
Brown-Heatly Bldg. Café	4900 N. Lamar Blvd., Austin, TX	4,061 sq. ft. \$71,067.50	\$10,924.09	\$844.88	\$3,939.17	State General Revenue and Federal Funding
William P. Clements Bldg. Café	300 W. 15th St., Austin, TX	3,239 sq. ft. \$56,682.50	\$3,433.34	\$5,603.47	\$1,684.28	State General Revenue and Federal Funding
